

| :y. | Description   |                            |          |  |  |  |  |
|-----|---|----------------------------|----------|--|--|--|--|
|     | The motor is a totally enclosed, fan-cooled motor with principal dimensions to IEC and DIN standards. Electrical tolerances comply with IEC 60034.  |                            |          |  |  |  |  |
|     | The motor efficiency is classified as IE3 in accordance with IEC 60034-30-1.  |                            |          |  |  |  |  |
|     | The motor does not incorporate motor protection and must be connected to a motor-protective circuit breaker which can be manually reset. The motor-protective circuit breaker must be set according to the rated current of the motor (I1/1).                                   |                            |          |  |  |  |  |
|     | The motor can be connected to a variable speed drive for adjustment of pump performance to any duty point.<br>Grundfos CUE offers a range of variable speed drives. Please find more information in Grundfos Product Center.  |                            |          |  |  |  |  |
|     | Further product details   |                            |          |  |  |  |  |
|     | Cast-iron parts have an epoxy-based coating made in a cathodic electro-deposition (CED) process. CED is a high-quality dip-painting process where an electrical field around the products ensures deposition of paint particles a a thin, well-controlled layer on the surface. |                            |          |  |  |  |  |
