oddol No 98973033		
on-self-priming, single-stage, centrifugal pump design erformance according to EN 733. Flanges are PN 10 w ial suction port, a radial discharge port and horizontal pupling, bearing bracket and impeller without disturbing	vith dimension shaft. It is of t	ns according to EN 1092-2. The pump has an the back pull-out design enabling removal of the
ne unbalanced rubber bellows seal is according to DIN ne pump is fitted with a foot-mounted, fan-cooled asyn ise frame.		tor. Pump and motor are mounted on a comm
ump and motor are mounted on a common steel base ne back pull-out design together with a spacer coupling e pump housing and motor from the base frame.		
his saves realignment of pump and motor after service 1) Remove coupling. 2) Remove the bolts in the bearing bracket support for 3) Remove the bearing bracket from the pump housin	ot.	
	y.	
ump		
ne pump housing has both a priming and a drain hole puble-curved blades with smooth surfaces. The impelle ad hydraulically balanced to compensate for axial thrus	er is statically	gs. The impeller is a closed impeller with balanced according to ISO 1940-1 class G6.3
ear rings used in pump housing and for impeller are n		
ne pump is fitted with an unbalanced rubber bellows so Ilows. Due to the bellows, the seal does not wear the n the shaft.		
MG Filename: GRALON_NB-NK-G_SHAFTSEAL_Bx	<pre>x.gif }</pre>	
eal faces: • Potating seal ring material: silicon carbide (SiC)		
 Rotating seal ring material: silicon carbide (SiC) Stationary seat material: silicon carbide (SiC) 		
nis material pairing is used where higher corrosion res	istance is req	uired. The high hardness of this material pairir
fers good resistance against abrasive particles. econdary seal material: EPDM (ethylene-propylene rul	h h a v)	

EPDM has excellent resistance to hot water. EPDM is not suitable for mineral oils.

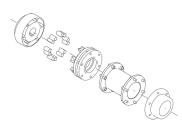

The shaft is made of stainless steel and has a diameter of 48 mm where the coupling is mounted.

The pump uses a spacer coupling between the pump and motor shaft.

Motor

The motor is a totally enclosed, fan-cooled motor with principal dimensions to IEC and DIN standards. Electrical tolerances comply with IEC 60034.

The motor efficiency is classified as IE3 in accordance with IEC 60034-30-1.

The motor has thermistors (PTC sensors) in the windings in accordance with DIN 44081/DIN 44082. The protection reacts to both slow- and quick-rising temperatures, e.g. constant overload and stalled conditions.

Thermal switches must be connected to an external control circuit in a way which ensures that the automatic reset cannot cause accidents. The motors must be connected to a motor-protective circuit breaker according to local regulations.

The motor can be connected to a variable speed drive for adjustment of pump performance to any duty point. Grundfos CUE offers a range of variable speed drives. Please find more information in Grundfos Product Center.

Further product details

Cast-iron parts have an epoxy-based coating made in a cathodic electro-deposition (CED) process. CED is a high-quality dip-painting process where an electrical field around the products ensures deposition of paint particles as a thin, well-controlled layer on the surface.
